DETAILED ACTION

The following is responsive to Applicant's election received April 25, 2002.

Applicant's remarks traversing the previous restriction requirement mailed March 26, 2002 have been considered and are found to be persuasive. The Examiner withdraws the restriction requirement.

Upon further consideration of the claims with the primary examiner, the following election of species is submitted.

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

Election of Species

1. This application contains claims directed to the following patentably distinct species of the claimed invention: compositions and methods of use thereof comprising (I) one or more phytosterols and/or phytostanols (claim 10); (II) a composition capable of inhibiting cholesterol biosynthesis (claim 4) derived from the plants set forth in claim 6; (III) a composition capable of increasing cholesterol metabolism (claim 12) derived from the plants set forth in claim 13.

For (I) Applicant is respectfully requested to elect a single species of phytosterol and/or phytostanol. Please see claim 10. The compounds of claim 10 are structurally and chemically distinct and the search for one would not be required for the other.

For (II) and (III), Applicant must elect a specific plant species set forth in claims 6 and 13, these plant species are distinct and the search for one is not required for the other.

Art Unit: 1614

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 21-24 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1614

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cybille Delacroix-Muirheid whose telephone number is (703) 306-3227. The examiner can normally be reached on Tue-Fri from 8:30 to 6:00. The examiner can also be reached on alternate Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel, can be reached on (703) 308-4725. The fax phone number for this Group is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1235.
